**live and work in Hong Kong**

Karin Weber Gallery Hong Kong artist group Brain Rental, founded by CHU, KEVIN and ROGER in 2010, take as their subject matter the “the absurdity of modern life” and the uncanny relationship between humans and technology

“We hope to isolate the audience from the real world, temporarily, and provide a space to think and consider the way we behave. Ultimately, the idea is to think about the relationship we have with technology in a more conscious way.”
